INDEX

Serial Number	Name of the Experiment	Page
01	Write a prolog program that contains a number of predicates that describe a family's genealogical relationships.	01-03
02	Write a prolog program to print a list of items.	04-05
03	Write a prolog program to Print a list of numbers.	06-07
04	Write a prolog program to Print the GPA of a given student.	08-09
05	Write a prolog program to Print the student-professor relation.	10-11
06	Write a prolog program to Print the Nth Fibonacci number.	12-13
07	Write a prolog program to Print the Factorial of a number.	14-15
08	Write a prolog program to Read a number and write the cube of the number.	16-17
09	Write a prolog program for Computing Greatest Common Divisor (GCD).	18- 19
10	Write a prolog program to satisfy a list of goals.	20-21
11	Write a prolog program to find the length of list.	22-22
12	Write a prolog program to concatenation the two lists.	23-24
13	Write a prolog program to delete an element from the list.	25-26
14	Write a prolog program to insert an item into list.	27-27
15	Write a prolog program to union of two sets.	28-28
16	Write a prolog program to intersection of two sets.	29-29
17	Write a prolog program to do bubble sort program.	30-31

Serial Number	Name of the Experiment	Page
18	Write a prolog program to demonstrate looping until a condition is satisfied.	32-32
19	Write a prolog program to demonstrate looping of a fixed number of times.	33-33
20	Write a prolog program to print 1-n by using looping.	34-34
21	Write a prolog program to print n-1 of using looping.	35-35
22	Write a menu-based prolog program.	36-37
23	Write a prolog program that checks whether there exists a route between two nodes.	38-38
24	Write a prolog program for simulating Graph & DFA.	39-40
25	Write a prolog program for simulating NFA.	41-43
26	Write a prolog program to find path in a graph.	44-45
27	Reading/Writing Files in prolog.	46-47
28	Write a program for Depth first search (DFS).	48-50
29	Write a program for Breadth first search (BFS).	51-53
30	Write a program for Depth limited search (DLS).	54-55
31	Write a program for Iterative Deepening Search (IDS).	56-58
32	Write a program for Bidirectional Search.	59-61
33	Write a program for Greedy Best First Search.	62-64
34	Write a program for A* Best First Search.	65-68
